As a recently graduated mortuary student, I am excited to enter the funeral industry to provide coordinated and compassionate care to families within their personal times of need. With a recently earned degree in Mortuary Science from Ivy Tech Community College, I am eager to bring my skills and knowledge to your establishment.

During my academic career, I developed a strong foundation in mortuary science, including coursework in embalming techniques, funeral arrangements, and grief counseling. My practical experiences during internships have honed my ability to provide compassionate care to grieving families and have given me the confidence and experience to launch into the next chapter along my mortuary journey.

While in mortuary school I heavily focused on:

- The fundamentals of embalming and restorative art
- Rules and Regulations that manage the mortuary industry
- Funeral culture and grief psychology
- Merchandise and sales

Apart from my school experience, I have also focused my time in education on incorporating and reaching out to the greater Indiana community to build stronger relationships and greater communal bonds. I was appointed as a board member of the Metro Ministries in January of 2024; a ministry grant foundation that provides resources to ministries in the greater Indianapolis area for the United Methodist Church. I was also appointed to be a committee member on the Indiana United Methodist Annual Conference Planning Committee for 2024; the theme of the conference was Cultivate Joy and I primarily focused on planning and executing the celebration of life service and the staging and set up of each worship movement and plenary/voting session.

My hope in being employed within your company is that I might fine tune the skills I have developed within my mortuary schooling and scholarship and to further engage in lifelong learning and professional development. I hope to hear from you soon

Sincerely,

Andrew Griffin
